

TrialPrep, LLC announces the launching of the new DEPO version - importing PDF file is now possible!

Alameda, CA October 18, 2009 – TrialPrep, LLC announces the launching of a new DEPO version allowing the import of PDF files into its program.

PDF files are more and more used in the legal field - PDF files represent a certain security for transferring files from one computer to another. PDF files prevent changing the content. Transcripts are delivered in different formats such as text format for editing or PDF format for printing and reading.

To answer a strong demand from our customers, DEPO has now been improved so that YOU can now import PDF files (but not scanned). At present only a Beta version is available. At this time we make no claims or warranties.

Depo is a relatively simple yet very robust program. There is no other product like Depo that allows the user to export questions, answers, page, and line numbers of testimony to other software programs like Microsoft Word and WordPerfect with just a mouse click.

About TrialPrep, LLC

TrialPrep, LLC was founded in 2005 by Laurence Steffan, a trial attorney who needed a simple and easy way to extract specific witness trial questions from a deposition transcript. Providing attorneys with **innovative and highly efficient software** to increase the quality of their services is the main mission TrialPrep, LLC sets out to achieve through its Direct/Cross-Examination Preparation Software. Since our creation in 2005, TrialPrep, LLC has implemented a vigorous and ambitious strategy focusing on Marketing and Innovation to ensure we meet our clients' needs.
